NHK Spring Invests in Kanagawa Prefecture’s “Green Bonds”

NHK Spring Co., Ltd. (Head Office: Yokohama; President and COO: Kazuhisa Uemura) is pleased to announce its decision to invest in green bonds issued by Kanagawa Prefecture for the fourth consecutive year.

Kanagawa Prefecture is home to 26 of our domestic group sites, where approximately 4,700 employees—representing about half of our domestic workforce—are based. Through this investment, NHK Spring aims to actively support initiatives that improve the natural environment and strengthen disaster prevention measures in the region — a key operational base for the company.

Contributing to the sustainability of Kanagawa Prefecture is expected to create synergies with NHK Spring’s core business activities and further enhance the company’s contributions to the local community.

NHK Spring remains committed to contributing to the realization of a sustainable society through its business operations and will continue to support environmental and social initiatives aligned with this goal.

<About the Bonds>

| | |
|-----------------|---|
| Name | Kanagawa Prefecture’s 6th 5-year publicly offered municipal bonds (green bonds) |
| Maturity period | 5 years |
| Issue amount | 12 billion yen |
| Issue date | October 27, 2025 |

In February 2020, Kanagawa Prefecture formulated its Kanagawa Prefecture Water Disaster Prevention Strategy as a measure against water disasters such as heavy rains and typhoons caused by climate change. In September of the same year, to promote the strategy, it established a Green Bond Framework.

In March 2023, in consideration of the environment-related changes since the strategy's formulation (such as intensifying climate-related disasters, the Embankment Regulation Law, COVID-19, and advancements in disaster response through digitization), Kanagawa Prefecture revised its Water Disaster Prevention Strategy to further strengthen its measures.

Along with this revision, the framework was also updated, and the eligibility for project funding has been expanded. The funds raised through the issuance of these bonds are scheduled to be allocated to the following projects related to the Kanagawa Prefecture Water Disaster Prevention Strategy.

| Phenomena expected because of climate change | Eligible Projects and Overview |
|--|---|
| Rivers (floods) | <ul style="list-style-type: none"> ➤ Developing retention basins and bottleneck sections of river channels ➤ Enhancing and strengthening river disaster prevention measures |
| Debris flows and landslides | <ul style="list-style-type: none"> ➤ Developing sediment disaster prevention facilities ➤ Developing and reinforcement of afforestation |
| Storm surges and high waves | <ul style="list-style-type: none"> ➤ Developing coastal protection facilities, etc. ➤ Strengthening disaster prevention functions of fishing port facilities, etc. |
| Urban infrastructure (transportation) and Impact on daily life | <ul style="list-style-type: none"> ➤ Enhancement and strengthening of disaster prevention measures for roads |
