NHK Spring Invests in Nagano Prefecture's "Green Bonds"

NHK Spring Co., Ltd. (Head Office: Yokohama; President and COO: Kazuhisa Uemura) is pleased to announce its decision to invest in green bonds issued by Nagano Prefecture for the fourth consecutive year.

Nagano Prefecture is home to 14 of our domestic group sites, where approximately 2,000 employees—representing about 20 percent of our domestic workforce—are based. Through this investment, NHK Spring aims to actively support initiatives that improve the natural environment and strengthen disaster prevention measures in the region — a key operational base for the company.

Contributing to the sustainability of Nagano Prefecture is expected to create synergies with NHK Spring's core business activities and further enhance the company's contributions to the local community.

NHK Spring remains committed to contributing to the realization of a sustainable society through its business operations and will continue to support environmental and social initiatives aligned with this goal.

<About the Bonds>

Name	Nagano Prefecture's publicly offered municipal bonds no. 2025-3 (10-years green bonds)
Maturity period	10 years
Issue amount	10 billion yen
Issue date	October 24, 2025

The funds raised through the issuance of these bonds will be allocated to the environmental measures listed below that Nagano Prefecture is undertaking to achieve net-zero CO₂ emissions by 2050 and to avoid or reduce damage from natural disasters caused by climate change (measures for adaptation).

Category	Projects
Renewable energy	➤ Installation of micro-hydroelectric power generation facilities
Clean transport	➤ Subsidies for Shinano Railway's railcar replacement
Energy efficiency	➤ Upgrading of facilities of prefecture-owned buildings (install LED lighting equipment) ➤ Construction and renovation of prefecture-owned buildings
Climate change adaption	➤ River improvement for flood control ➤ Improvement of the agricultural reservoirs ➤ Landslide disaster management including erosion and torrent control, measures against steep slope collapses, etc. ➤ Improvement of the transport infrastructure (traffic lights power supply equipment, road disaster prevention management, etc.)
Environmentally sustainable management of biological and natural resources, etc.	➤ Construction of forest roads for forest environment conservation
Conservation of terrestrial and aquatic biodiversity	➤ Measures for purifying the water quality of Lake Suwa
