## **NHK SPRING Decides to Invest in Gunma Prefecture's "Green Bonds"**

NHK SPRING CO., LTD. (Head Office: Yokohama; President & COO: Kazuhisa Uemura) has decided to invest in the green bonds to be issued by Gunma Prefecture this year.

Approximately 1,000 people, or about 10% of our Group's employees in Japan, work at our major automotive seating business site in Gunma Prefecture. Through this investment, we will be deeply involved in measures such as improving the natural environment and flood control of the Prefecture, an important base for our company. We believe that contributing to the sustainability of Gunma Prefecture will, in turn, result in greater synergy regarding our contributions to local communities through our core business.

Based on our investment in these bonds, we will continue to strive to contribute to the realization of a sustainable society through our business activities.

### <About the Bonds>

Name	Gunma Prefecture Public Offered Public Debt (10-year Green Bond) 4th
Maturity period	10 years
Issue amount	10 billion yen
Issue date	July 17, 2026

In recent years, climate change has led to increasingly severe and frequent natural disasters, resulting in more serious impacts on society and the economy. In response, expanding the use of renewable energy, promoting energy efficiency, and strengthening adaptation measures against floods, landslides, and other disasters have become important priorities.

Gunma Prefecture has established a Sustainability Bond Framework to promote the development of a decarbonized society and environmental conservation initiatives, with the aim of realizing "Gunma, a prosperous and sustainable environmental prefecture."

The proceeds from the issuance of these bonds will be allocated to Gunma Prefecture's initiatives listed in the table below, which are aimed at achieving a decarbonized society and adapting to climate change.

Project Categories under the Green Bond Principles	Projects to be allocated
Energy Efficiency	➤ Energy efficiency improvements to prefectural facilities
Environmentally Sustainable Management of Living Natural Resources and Land Use	➤ Environmental improvement projects in Oze National Park and other natural areas ➤ Forest road maintenance
Conservation of Terrestrial and Aquatic Biodiversity	➤ Improvement of buffer zones in rivers
Adaptation to Climate Change	➤ Flood control measures, including river improvement and reservoir development ➤ Development of sediment-related disaster prevention facilities (sabo dams, erosion control facilities, etc.) ➤ Undergrounding of utility lines
