NHK SPRING Decides to Invest in Iwate Prefecture's "Green/Blue Bonds"

NHK SPRING CO., LTD. (Head Office: Yokohama; President & COO: Kazuhisa Uemura) has decided to invest in the green/blue bonds to be issued by Iwate Prefecture this year.

Our group company, TOHOKU NIPPATSU CO., LTD., operates in Iwate Prefecture. As a key base for the Group in the Tohoku region, it is supported by the local community and is primarily engaged in the manufacture and sale of automotive components.

Through this investment, we will be closely involved in initiatives to improve the natural environment and strengthen flood prevention and disaster mitigation measures in Iwate Prefecture, one of our important operational bases. We believe that contributing to the sustainability of Iwate Prefecture will create greater synergies with our efforts to contribute to local communities through our core business activities.

Building on this investment, we will continue to strive to contribute to the realization of a sustainable society through our business activities.

<About the Bonds>

Name	Iwate Prefecture Fiscal Year 2026 First Public Offering Bonds (Green/Blue Bonds,5-Year)
Maturity period	5 years
Issue amount	5 billion yen
Issue date	July 24, 2026

Iwate Prefecture is blessed with abundant natural resources, including forests, rivers, and marine environments, which form an important foundation for local communities and industries. At the same time, increasing environmental challenges have made it essential to balance the conservation of the natural environment with its sustainable use.

Against this backdrop, Iwate Prefecture has established a Green/Blue Bond Framework covering both green and blue projects to promote environmental conservation and sustainable development.

The proceeds of these bonds will be allocated to the projects outlined below, which contribute to sustainable development as well as environmental conservation and restoration in coastal areas.

Green Projects		Blue Projects	
Category	Main Projects	Category	Main Projects
Renewable Energy	Installation of solar power generation facilities	Water Environment Conservation	Sewage treatment and drainage infrastructure development
Energy Efficiency	Introduction of high-efficiency equipment and LED lighting	Marine Ecosystem Conservation	Seaweed bed development and improvement of fishing ground environments
Pollution Prevention	Illegal dumping countermeasures and air quality measures	Fisheries Resource Conservation	Development of fishing ports and fisheries-related facilities
Natural Environment Conservation	Development of natural parks and related facilities	Forest and Watershed Management	Forest management for watershed conservation
Clean Transportation	Introduction of electric vehicles and charging facilities	Coastal Protection and Disaster Resilience	Breakwater and seawall development
Climate Change Adaptation	River improvement, erosion control, and road disaster prevention measures		—
