#### 1. Qualitative Information related to Consolidated Financial Results

## (1) Explanation of Consolidated Financial Results

During the nine months ended December 31, 2023 (hereinafter the "period under review"), the global economy showed signs of recovery, but the outlook remained uncertain due to a global rise in interest rates, soaring prices of energy and various materials, and other factors.

In the automotive market, one of the main business fields of the Group, the production volume in Japan was 6,569 thousand units, an increase of 16.1% from the same period last year. In addition, in North America (U.S. and Canada), 9,194 thousand units were manufactured, up 6.2% from the same period last year. In China, 20,875 thousand units were manufactured, up 5.0% from the same period last year. In Thailand, 1,404 thousand units were manufactured, up 4.4% from the same period last year. (All calculations are based on the figures of each region at the end of the quarter.)

In the data communications market, the Group's other main business field, the global production volume of hard disk drives (HDDs) declined year—on—year, resulting in a decrease in the total demand for suspensions, our main products.

As a result of the business environment mentioned above, the Group recorded net sales of 562,288 million yen (up 10.0% year-on-year), operating profit of 17,695 million yen (down 28.5% year-on-year), ordinary profit of 28,425 million yen (down 18.0% year-on-year), and profit attributable to owners of parent of 20,891 million yen (down 11.4% year-on-year).

Results by segment are as follows:

#### [Automotive Suspension Springs Business]

Automotive suspension springs business was significantly affected by soaring labor costs due to the tight labor market in North America and increased fixed costs, including power and utilities costs, although production which had been depressed due to shortages in the supply of semiconductors and other automotive parts, recovered. As a result, we posted net sales of 122,572 million yen (up 15.3% year-on-year) and an operating loss of 3,209 million yen (compared with an operating loss of 3,315 million yen in the same period last year).

#### [Automotive Seating Business]

Production in the automotive seating business, which had been depressed due to shortages in the supply of semiconductors and other automotive parts, has recovered. As a result, our net sales increased by 22.9% year—on—year to 240,985 million yen and operating profit increased by 189.4% year—on—year to 12,564 million yen.

#### [Precision Springs and Components Business]

Precision springs and components business was significantly affected by increasing fixed costs, including power and utilities costs, although production, which had been depressed due to shortages in the supply of semiconductors and other automotive parts, recovered. In the information and data communications—related business, sales volume declined due to production adjustments by HDD manufacturers. As a result, net sales decreased 5.1% year—on—year to 117,181 million yen, and operating profit decreased 77.1% year—on—year to 3,087 million yen.

#### [Industrial Machinery and Equipment, and Other Operations]

In the industrial machinery and equipment, and other operations, net sales decreased 4.4% year—on—year to 81,549 million yen and operating profit decreased 48.7% year—on—year to 5,253 million yen, due to a decrease in the volume of semiconductor process components, affected by the sluggish semiconductor market.

#### (2) Explanation of Consolidated Financial Position

Total assets at the end of the period under review increased by 52,149 million yen from the end of the previous fiscal year to 658,188 million yen. This was mainly attributable to an increase in investment securities resulting from an increase in the market value of listed shares held, and an increase in cash and deposits, etc. resulting from the impact of a weakening yen on foreign exchange rates.

Liabilities increased by 19,919 million yen from the end of the previous fiscal year to 260,099 million yen. This is mainly attributable to an increase in deferred tax liabilities resulting from an increase in the market value of investment securities.

Net assets increased by 32,229 million yen from the end of the previous fiscal year to 398,089 million yen. This is mainly attributable to increases in valuation difference on available—for—sale securities, foreign currency translation adjustments, and retained earnings owing to profit attributable to owners of parent.

#### (3) Explanation Regarding Future Projection Including Consolidated Financial Forecasts

We have revised its full-year earnings forecast as of today. For details, please refer to the "Notice Concerning Recording of Gain on Sale of Investment Securities (Extraordinary income) and Revision of earnings forecast and Revision of Dividend Forecast "released on February 13, 2024.
